

## Cutting mode — devices

Third mode in the top-bar switch: [Edit | Lettering | Cutting]. Same three-pane shape as Lettering — region rail on the left, review card on the right, page canvas in the middle. Functional on macOS only this iteration; on iPad and iPhone the switch is visible but disabled, with an honest explanation on tap. Source page: page-014 photo, regions from the local pipeline.

### Cutting mode — macOS · results

Primary screen. 12 proposed regions over the source photo, #04 selected with layer-style resize handles. Kind chip + confidence badge on every row — color never alone.

1440x920 · region #04 selected · Character · 92%

Confidence badges — color + text, never color alone

|     |                                      |
|-----|--------------------------------------|
| 92% | High · ≥ 85% · green                 |
| 64% | Medium · 50–84% · amber              |
| 31% | Low · < 50% · coral — "look closely" |

Coral reuses the DS "needs attention" weight — not an error, a scanning aid. Percentage text always present.

Kind chips — two new members, same family

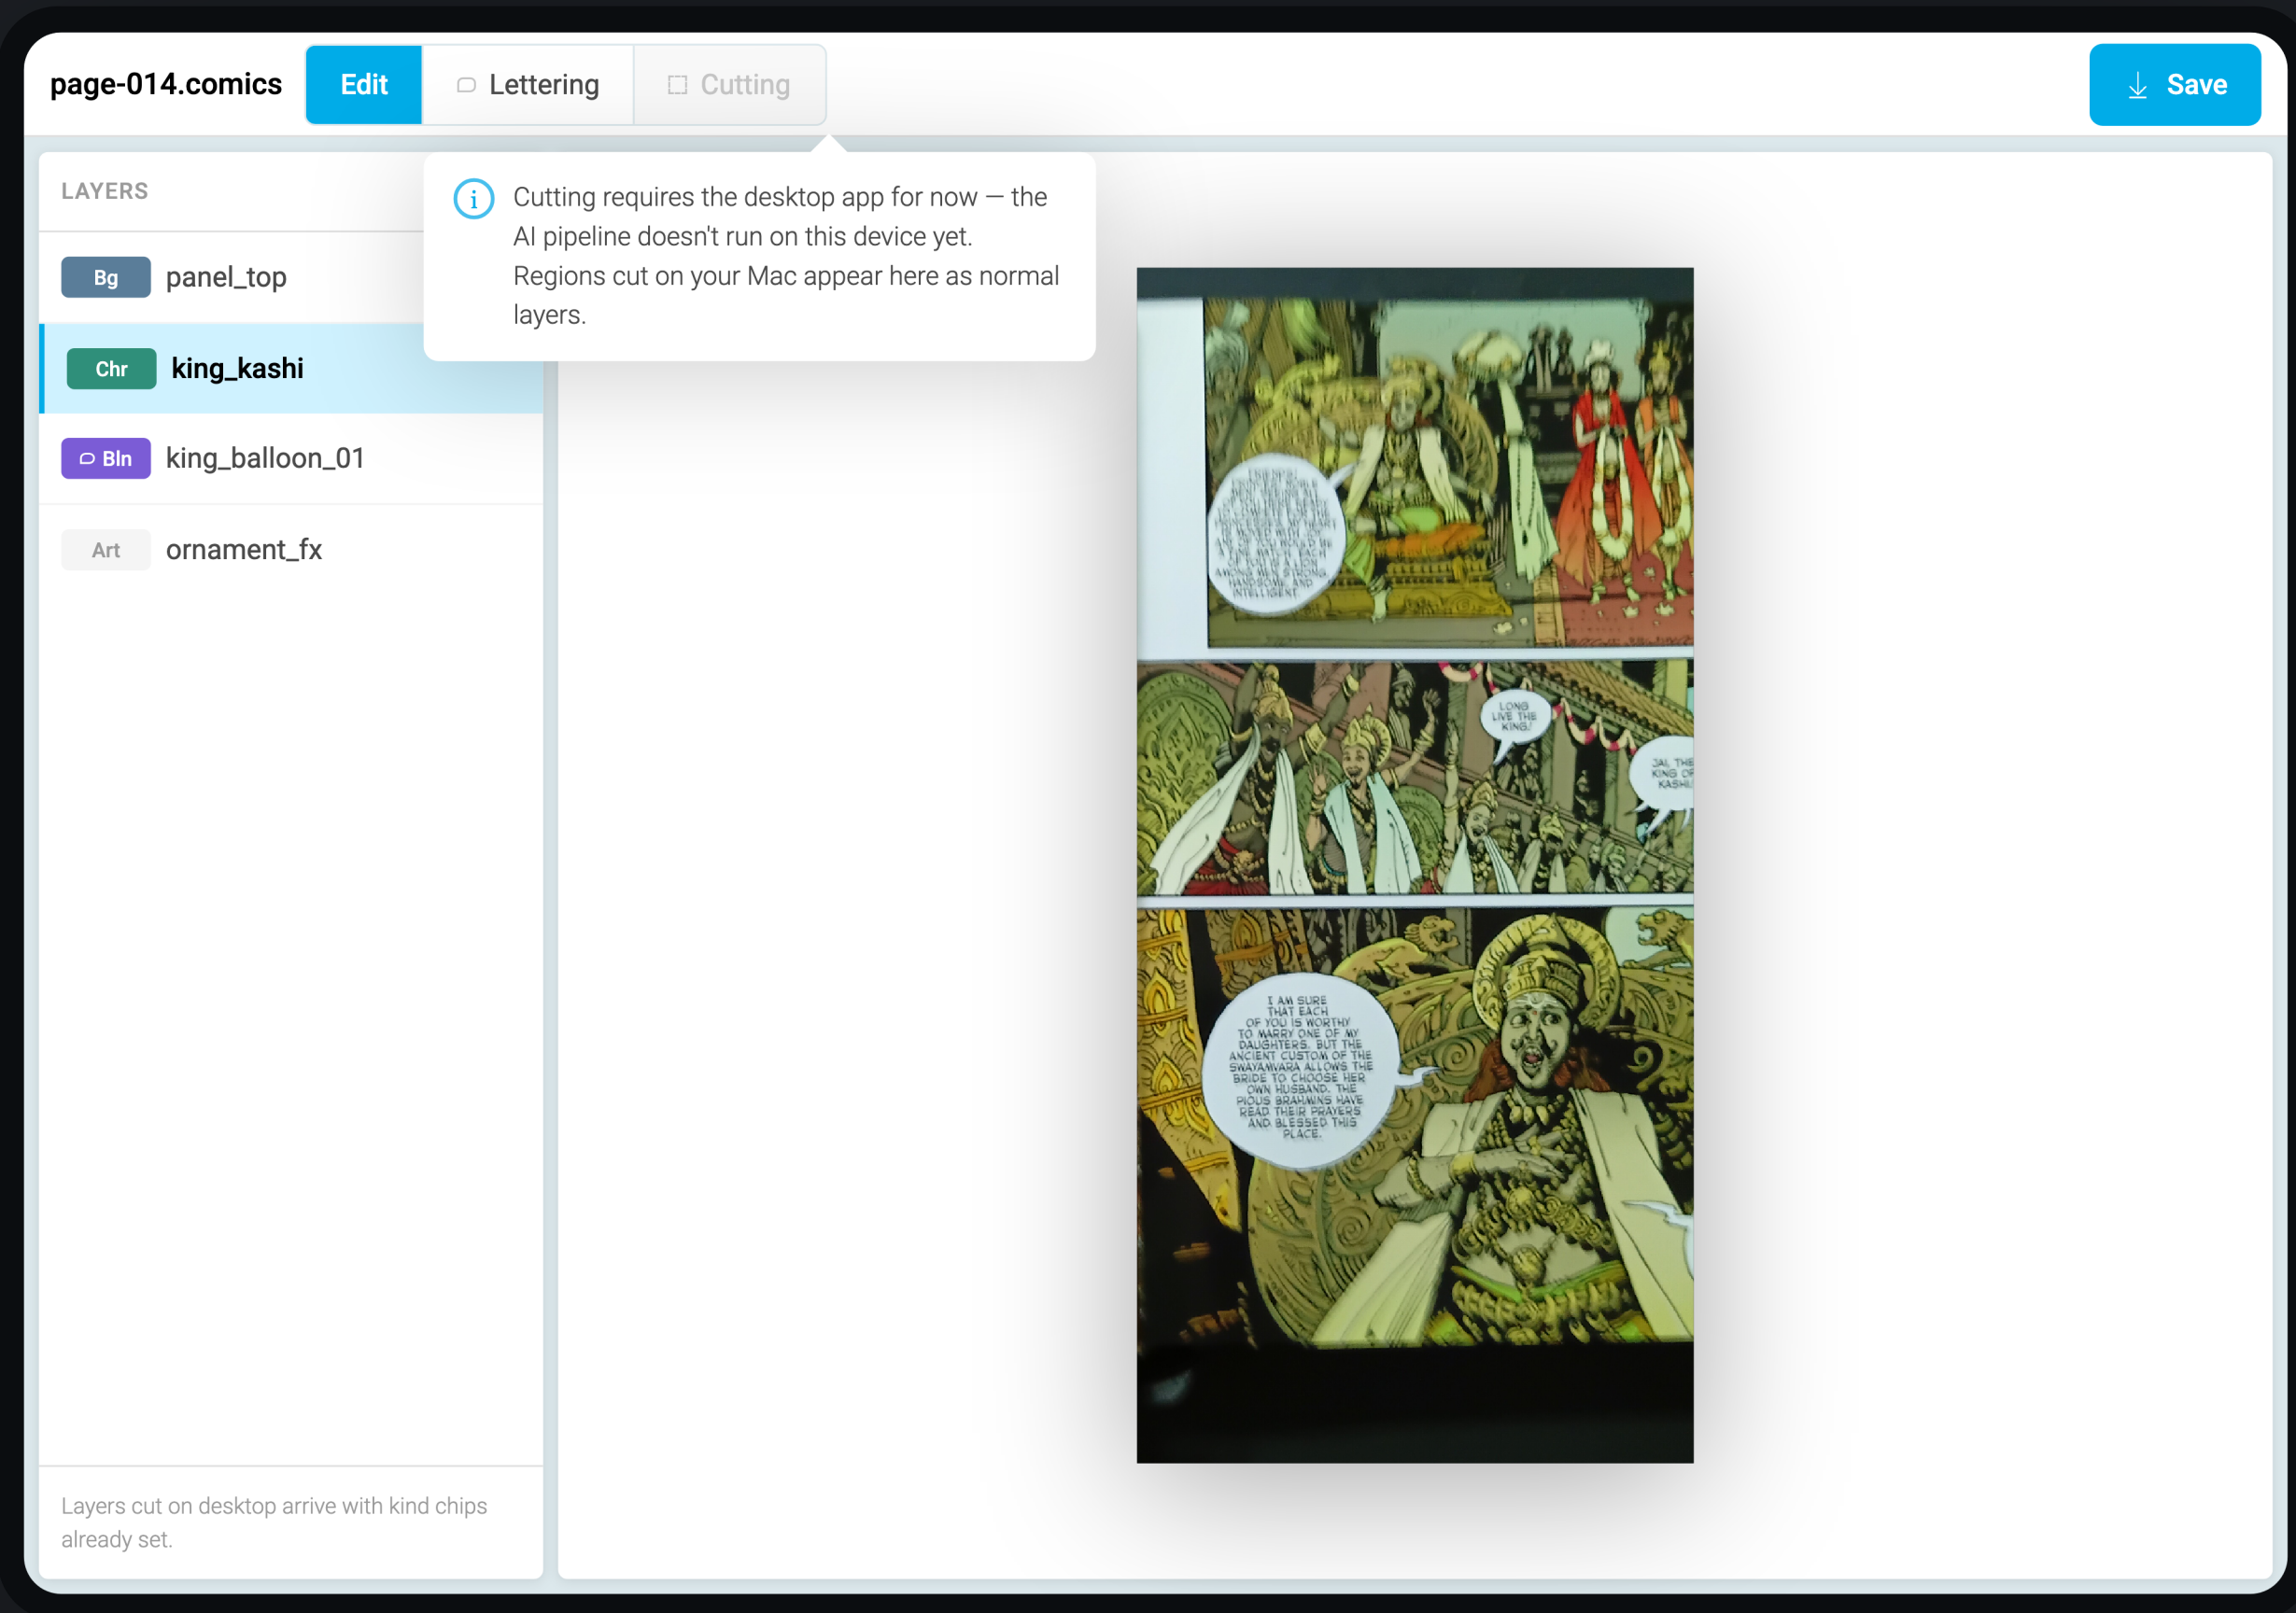

|     |                                   |
|-----|-----------------------------------|
| Bg  | Background — new · slate          |
| Chr | Character — new · teal            |
| Bln | Balloon — from Lettering · violet |
| Art | Art / other — catch-all default   |

Slate and teal sit outside the sky-blue / coral vocabulary, same rule as violet and amber. Blue stays selection.

### Cutting on iPad — disabled, not hidden

The pipeline is desktop-only this iteration. The switch shows all three modes; Cutting is grayed. A tap answers with a popover — never a silent inert control, never entering-then-failing.

iPad Pro 11" · landscape · Edit mode · corrector just tapped the grayed switch

### Cutting on iPhone — disabled, not hidden

Same rule, single column. Tapping the grayed segment shows a one-line inline note under the switch instead of a popover.

Edit mode · switch visible, Cutting grayed

After tapping the grayed segment — inline note
